

Marine design engineer

Helsinki, Turku

Reference Number:

We are looking for a MARINE DESIGN ENGINEER to join our team in Turku or Helsinki, for a permanent position.

The job includes design tasks/project management in marine engineering domain according to the applicants abilities (suchs as frame, mechanical, deck fitting, HVAC or electrical). This position also includes multi-disciplinary work environment, and monitoring compliance with regulations. Therefore, an understanding of and interest in shipbuilding and ship design regulations is essential. The candidate should have a suitable education in a field such as mechanical or marine engineering (engineer or graduate engineer) and a few years of experience in a similar role

As an expert you will work closely with customers and the authorities as well as directly with the customer, which is why we expect the applicants to have:

- *customer service attitude*
- *active approach and problem-solving capability*
- *the ability to see the big picture*
- *ability to work in a team as well as independently*
- *good communication skills*
- *fluent English and basic Finnish language skills*

We offer a varied and challenging job description where you have the opportunity to develop according to your abilities and interests. You will work in a relaxed and low-hierarchical working community together with skilled and helpful professionals. In addition to a good atmosphere and interesting tasks, we offer you other traditional benefits, such as lunch, sports and cultural benefits, leisure accident insurance and the possibility to use a company telephone and bicycle.

If you are interested, please send your application and CV by 27.09.2024.

For more information, you can contact Eemeli Kontto, +358 40 152 4291.
